Index to
JOURNAL OF ENGINEERING FOR INDUSTRY

Volume 84, 1962

The Journal of Engineering for Industry in 1962 was issued quarterly in February, May, August, and November.

Issue	Page Numbers
February	1–196
May	197–300
August	301–395
November	397–508

A

ABRASIVES. *See also* GRINDING WHEELS
Grinding with abrasive disks
Part 1. Test procedures and performance criteria ... 431
Part 2. Disk performance and dressing mechanisms ... 442
Part 3. Attritious camber, glazing, and rate of cut ... 451
Part 4. Grinding power and temperatures ... 466

AIR TESTS. *See* COMPRESSORS

AIRPLANES
Catalytic filtration of ozone in airborne application ... 42
Runout path of an airplane equipped with skids ... 301

ALBRECHT, PAUL
Self-induced vibrations in metal cutting .. 405

ALBRIGHT, RUSSEL K.
Tensions in straight and curvilinear belt conveyers (D) ... 195

ANALYSIS. *See* COMPUTERS, THERMODYNAMICS

ARNSTEIN, BENNETT
Analytical determination of poles in the coincidence position of links in four-bar mechanisms required for valves correctly apportioning three fluids in a chemical apparatus (D) ... 368

ATTERBURY, T. J.
Stresses in tapered transition joints in pipelines and pressure vessels ... 321

B

BARKAN, PHILIP
Determination of the closing time of a solenoid actuated mechanism (D) ... 427

BAUMGARTEN, J. R.
Determination of the closing time of a solenoid actuated mechanism ... 423

BEAMS
Maximum stresses in beams and plates vibrating at resonance ... 149

BEARINGS
Stability of the high-speed journal bearing under steady load. 1. The incompressible film ... 351

BECKER, HERBERT
Exploratory study of stress concentrations in thermal shock fields ... 343

BECKER, STANLEY J.
Shrink fits of moderately long bands on thin-walled cylinders (D) ... 341
Strain hardening in the yielded compound cylinder ... 220

BELL, R. B.
Vessel nozzles and piping flexibility analyses ... 225

BELT CONVEYERS. *See* MATERIALS HANDLING

BERGMAN, ELMER O.
Effects of external pressure on thin-shell pressure vessel heads (D) ... 216

BERT, C. W.
Radius of curvature of a double helix ... 394

BLOCKLEY, W. V.
Catalytic filtration of ozone in airborne application (D) ... 47

BOBERG, JOHN E.
Catalytic filtration of ozone in airborne application ... 42

BOCHAROV, Y.
Effect of vibration on plastic flow in coining ... 502
Mechanics of the coining process ... 491

BOGARDUS, F. J.
Superposition of stress concentration factors (D) ... 132

BOLLER, K. H.
Influence of normal stress on creep in tension and compression of polyethylene and rigid polyvinyl chloride copolymer (D) ... 247

BONNELL, RONALD D.
Method for reducing the number of degrees of freedom in mathematical models of damped linear dynamic systems (D). 421

BOTTEMA, O.
On the variety of motions generated by mechanisms (D) ... 159

BROCK, J. E.
Vessel nozzles and piping flexibility analyses (D) ... 235

BRUNELL, KARL
Constant diameter cams, their properties and design characteristics ... 161

C

CAMS
Constant diameter cams, their properties and design characteristics ... 161

CARBIDES. *See* MACHINE TOOLS

CARLSON, JOHN A.
Determination of the closing time of a solenoid actuated mechanism (D) ... 428

CAST IRON
Machinability of nodular cast irons
Part II. Effect of cutting conditions on flank adhesion ... 282

CATALYSIS. *See* FILTERS

CHENG, HERBERT S. Y.
Stability of the high-speed journal bearing under steady load. 1. The incompressible film (D) ... 357

CODEGONE, CESARE
Cyclic processes in closed regenerative gas machines analyzed by a digital computer simulating a differential analyzer (D) ... 178

COINING
Effect of vibration on plastic flow in coining ... 502
Mechanics of the coining process ... 491

COLE, R. R.
Surface effects and residual stresses in electrolytically ground steel ... 483

COLLOPY, FRANCIS H.
Method for reducing the number of degrees of freedom in mathematical models of damped linear dynamic systems (D). 421

COLWELL, L. V.
On determining the hardness of grinding wheels—I ... 113

COMPRESSORS
Predicting process gas performance of centrifugal compressors from air test data ... 248

COMPUTERS
Cyclic processes in closed regenerative gas machines analyzed by a digital computer simulating a differential analyzer. 165
Determination of the closing time of a solenoid actuated mechanism ... 423

CONVEYERS. *See* MATERIALS HANDLING

COOLANTS. *See* METAL CUTTING

CORSUN, ALEXANDER
Tensions in straight and curvilinear belt conveyers (D) ... 195

CRANE, E. V.
Forming, trimming, and edge finishing of molybdenum-0.5 per cent Ti sheet material (D) ... 300

CREEP OF MATERIALS
Influence of normal stress on creep in tension and compression of polyethylene and rigid polyvinyl chloride copolymer. 237

CYCLIC PROCESSES. *See* THERMODYNAMICS

CYLINDERS. *See also* METAL FITS, PRESSURE VESSELS
On thermal stresses in cylinders subjected to γ-ray heating ... 35

D

DAPPRICH, A. E.
Strength of thick-walled pressure vessels for materials with directional properties ... 197

DEFORMATION
Effect of vibration on plastic flow in coining ... 502
Effects of external pressure on thin-shell pressure vessel heads ... 205
Mechanics of the coining process ... 491
Shrink fits of moderately long bands on thin-walled cylinders ... 338
Strength of thick-walled pressure vessels for materials with directional properties ... 197

DE JONGE, A. E. RICHARD
Analytical determination of poles in the coincidence position of links in four-bar mechanisms required for valves correctly apportioning three fluids in a chemical apparatus ... 359

DIETZ, ALBERT G. H.
Influence of normal stress on creep in tension and compression of polyethylene and rigid polyvinyl chloride copolymer (D) ... 247

DISKS. *See also* ABRASIVES, GRINDING
Application of four-pole parameters to torsional vibration problems ... 21

DRESSING. *See* ABRASIVES, GRINDING

DYER, HUGH N.
Grinding with abrasive disks (D) ... 476

DYNAMICS. *See* VIBRATION

E

EDGE FINISHING. *See* MOLYBDENUM

EISS, N. S., JR.
Grinding with abrasive disks (D) ... 476

ELASTICITY. *See* PLASTICITY

ELECTRIC ANALOGY
Application of four-pole parameters to torsional vibration problems ... 21

ELECTRICAL EQUIPMENT
Thermal design for microminiaturized circuitry ... 1

ELECTROLYTIC GRINDING
Surface effects and residual stresses in electrolytically ground steel ... 483

ELECTRONIC ANALOGY
Cyclic processes in closed regenerative gas machines analyzed by a digital computer simulating a differential analyzer 165

ENGINES–GAS
Cyclic processes in closed regenerative gas machines analyzed by a digital computer simulating a differential analyzer. 165

EXTRUSION. *See* METAL EXTRUSION

F

FAUCETT, THOMAS R.
Superposition of stress concentration factors ... 129

FEEDBACK. *See* SERVOMECHANISMS

FILMS. *See* LUBRICATION

FILTERS
Catalytic filtration of ozone in airborne application ... 42

(D) denotes Discussion of a paper.

FINDLEY, W. N.
Influence of normal stress on creep in tension and compression of polyethylene and rigid polyvinyl chloride copolymer 237
FINKELSTEIN, T.
Cyclic processes in closed regenerative gas machines analyzed by a digital computer simulating a differential analyzer 165
FITS. *See* METAL FITS
FLANK ADHESION. *See* METAL CUTTING
FLUID MECHANICS
Predicting process gas performance of centrifugal compressors from air test data. 248
FLUID METERS. *See* VALVES
FORGING. *See* COINING
FOUR-POLE THEORY. *See* VIBRATION
FREIGHT CARS. *See* RAILROAD CARS
FREUDENSTEIN, FERDINAND
Analytical determination of poles in the coincidence position of links in four-bar mechanisms required for valves correctly apportioning three fluids in a chemical apparatus (D) 368
On the variety of motions generated by mechanisms 156
FRICTION. *See* METAL CUTTING
FRISCH, J.
Strain rate distribution during experimental metal rolling 81
Surface effects and residual stresses in electrolytically ground steel 483

G

GALIMBERTI, J. M.
Machinability of nodular cast irons
Part II. Effect of cutting conditions on flank adhesion (D) 288
GARDNER, KARL A.
Design of perforated plates (D) 319
GAS DYNAMICS
Predicting process gas performance of centrifugal compressors from air test data. 248
GEARS
Application of four-pole parameters to torsional vibration problems 21
GOODMAN, THOMAS P.
Analytical determination of poles in the coincidence position of links in four-bar mechanisms required for valves correctly apportioning three fluids in a chemical apparatus (D) 368
Determination of the closing time of a solenoid actuated mechanism (D) 428
GRANULAR MATERIALS. *See also* PROPELLANTS
GRAPHICAL METHODS
Graphical analysis of regenerative machine tool instability 103
Upper-bound solution as applied to three-dimensional extrusion and piercing problems 397
GRINDING. *See also* ELECTROLYTIC GRINDING
Grinding with abrasive disks
Part 1. Test procedures and performance criteria 431
Part 2. Disk performance and dressing mechanisms 442
Part 3. Attritious camber, glazing, and rate of cut 451
Part 4. Grinding power and temperatures 466
GRINDING WHEELS
On determining the hardness of grinding wheels—I 113
GROTH, V. J.
Vessel nozzles and piping flexibility analyses 225
GURNEY, J. P.
Graphical analysis of regenerative machine tool instability 103

H

HAHN, R. S.
Graphic analysis of regenerative machine tool instability (D) 111
On determining the hardness of grinding wheels—I (D) 126
Self-induced vibrations in metal cutting (D) 416
HALVERSTADT, R. D.
Surface effects and residual stresses in electrolytically ground steel (D) 490
HARDNESS. *See* GRINDING WHEELS
HARMONIC FUNCTIONS. *See* MATHEMATICS
HARTMAN, F. V.
Effects of external pressure on thin-shell pressure vessel heads (D) 217
HEADS. *See* PRESSURE VESSELS
HEAT-EXCHANGE EQUIPMENT. *See* TUBE SHEETS
HEAT TRANSFER
Cyclic processes in closed regenerative gas machines analyzed by a digital computer simulating a differential analyzer. 165
Predicting process gas performance of centrifugal compressors from air test data. 248
Thermal design for microminiaturized circuitry 1
HELIXES. *See* WIRE ROPE
HITOMI, K.
Machinability of nodular cast irons
Part II. Effect of cutting conditions on flank adhesion 282
HYDRAULICS. *See* SERVOMECHANISMS

I

INSTABILITY. *See* VIBRATION
INSTRUMENTS
Axial-flow porous plug apparatus 180
IP, CHING-U
Runout path of an airplane equipped with skids 301

J

JENSEN, PREBEN W.
Analytical determination of poles in the coincidence position of links in four-bar mechanisms required for valves correctly apportioning three fluids in a chemical apparatus (D) 370
JOINTS. *See* PRESSURE VESSELS, STRESSES AND STRAINS
JONES, EDWARD O., JR.
Effects of external pressure on thin-shell pressure vessel heads 205
JORGENSEN, S. M.
Strength of thick-walled pressure vessels for materials with directional properties (D) 202

K

KAMMERER, H. C.
Thermal design for microminiaturized circuitry 1
KECECIOGLU, D.
Comparative effect of land and crater wear on tool life when dry cutting, mist cooling, and flood cooling 49
KENNISON, GEORGE F.
Constant diameter cams, their properties and design characteristics (D) 164
KEYES, FREDERICK G.
Axial-flow porous plug apparatus (D) 188
KINEMATICS. *See also* CAMS
Analytical determination of poles in the coincidence position of links in four-bar mechanisms required for valves correctly apportioning three fluids in a chemical apparatus 359
Determination of the closing time of a solenoid actuated mechanism 423
On the variety of motions generated by mechanisms 156
Synthesis of rectilinear motion by mechanical harmonic function generators. 135
KING, R. C.
Axial-flow porous plug apparatus 180
KIRKLEY, D. W.
Cyclic processes in closed regenerative gas machines analyzed by a digital computer simulating a differential analyzer (D) 178
KOBAYASHI, S.
Effect of vibration on plastic flow in coining 502
Flank friction studies with carbide tools reveal sublayer plastic flow 53
Mechanics of the coining process 491
Metal-cutting analysis
I. Re-evaluation and new method of presentation of theories 63
II. New parameters 71
KRAUS, H.
Strain hardening in the yielded compound cylinder 220
KRAUSE, IRVIN
Synthesis of rectilinear motion by mechanical harmonic function generators. 135
Thermal stresses in spherical case-bonded propellant grains 144
KRENZKE, M. A.
Feasibility of pressure hulls for ultradeep running submarines (D) 391
KRONENBERG, M.
Metal-cutting analysis—II. New parameters (D) 79

L

LANE, R. O.
On determining the hardness of grinding wheels—I 113
LANGER, B. F.
Design of perforated plates 307
LEADED STEEL. *See* METAL CUTTING, STEEL ALLOYS
LEVINE, MYRON
Catalytic filtration of ozone in airborne application 42
LINGELBACH, D. D.
Determination of the closing time of a solenoid actuated mechanism (D) 429
LINKAGES. *See* KINEMATICS
LOCOMOTIVES
Progress in railway mechanical engineering, 1960-1961 265
LUBRICATION
Stability of the high-speed journal bearing under steady load. 1. The incompressible film 351

M

MACDONALD, A. G.
Flank friction studies with carbide tools reveal sublayer plastic flow 53
MACHINABILITY. *See* METAL CUTTING
MACHINE TOOLS. *See also* METAL CUTTING
Comparative effect of land and crater wear on tool life when dry cutting, mist cooling, and flood cooling 49
Flank friction studies with carbide tools reveal sublayer plastic flow 53
MADAY, CLARENCE J.
Stability of the high-speed journal bearing under steady load. 1. The incompressible film (D) 357
MARIN, JOSEPH
Strength of thick-walled pressure vessels for materials with directional properties 197
MARKL, A. R. C.
Vessel nozzles and piping flexibility analyses (D) 235
MARSH, H. W.
Effects of external pressure on thin-shell pressure vessel heads (D) 217
MATERIALS HANDLING
Tensions in straight and curvilinear belt conveyers 191
MATHEMATICS
Method for reducing the number of degrees of freedom in mathematical models of damped linear dynamic systems 418
Synthesis of rectilinear motion by mechanical harmonic function generators 135
MECHANISMS. *See also* CAMS, KINEMATICS
Determination of the closing time of a solenoid actuated mechanism 423
METAL CUTTING. *See also* ELECTROLYTIC GRINDING, GRINDING
Comparative effect of land and crater wear on tool life when dry cutting, mist cooling, and flood cooling 49
Flank friction studies with carbide tools reveal sublayer plastic flow 53
Forming, trimming, and edge finishing of molybdenum-0.5 per cent Ti sheet material 289
Free machining steel—IV. Tools with reduced contact length 89
Graphical analysis of regenerative machine tool instability 103
Machinability of nodular cast irons
Part II. Effect of cutting conditions on flank adhesion 282
Metal-cutting analysis
I. Re-evaluation and new method of presentation of theories 63
II. New parameters 71
Self-induced vibrations in metal cutting 405
METAL EXTRUSION
Upper-bound solution as applied to three-dimensional extrusion and piercing problems 397
METAL FITS
Shrink fits of moderately long bands on thin-walled cylinders 338
METAL FORMING. *See also* COINING
Forming, trimming, and edge finishing of molybdenum-0.5 per cent Ti sheet material 289
Upper-bound solution as applied to three-dimensional extrusion and piercing problems 397
METAL ROLLING
Strain rate distribution during experimental metal rolling 81
MICROMINIATURIZATION *See* ELECTRONIC EQUIPMENT
MODELS. *See* MATHEMATICS

(D) denotes Discussion of a paper.

MOHUN, W. A.
Grinding with abrasive disks
Part 1. Test procedures and performance criteria ... 431
Part 2. Disk performance and dressing mechanisms ... 442
Part 3. Attritious camber, glazing, and rate of cut ... 451
Part 4. Grinding power and temperatures ... 466

MOLLOY, C. T.
Application of four-pole parameters to torsional vibration problems ... 21

MOLYBDENUM
